

GoFundMe

Hello, my name is Tamara Parks, and I am seeking donations to participate in a sustainable development program abroad. The program's service-learning projects will help to further my interests in community farming, as a means to promote health, rehabilitation, and recreation. Your donations will aid me as I streamline my educational experience at UCONN this fall, pursuing a degree focused on the intersectionality of agriculture and technology.

If you have the means, please consider donating! Any form of support and every sized donation is deeply appreciated.
